

# Investments of the Amani Development Organization

**Tanzania** covers an area of 945,087 sq km (364,900 sq miles) stretching from the Indian Ocean to the Great Lakes region in the west of the country. The population is approximately 37,000,000. The central region of the nation is semi-arid and Tanzania is one of the poorest countries in the world.

The outlined area shows the location around Dodoma where Amani works in partnership with communities to establish and sustain: Water Resources, Agriculture & Forestry Development, Health, Education and Nutrition.

## Amani area of activity

Villages where Amani has made capital investments are marked in "red" in this excerpt from the map above showing the Dodoma area.

**Water Wells** - Providing clean water breaks the cycle of cholera and reduces typhoid and eye infections. Amani has now drilled and equipped five wells and completely restored one abandoned well.

**Farming** - Crops include maize, sorghum, millet, maize, peanuts and sunflowers, grape vines, fruit trees and vegetables. Farming provide income, supports relief work and vocational training.

**Orphans Care** - Parents dying of malaria or AIDS and poverty has created a large population of orphans. Amani has joined with local villages to provide assistance.

**Education** - In partnership with local communities, Amani is developing schools and providing scholarships for students as well as teachers.

# Amani Building Projects
